PROJECTS

AVAILABLE ON MY GITHUB ACCOUNT

SMARTMED CRM

Customer relations management for businesses and with a great dashboard, and customizations i made for Smartmed when i was working there using laravel for backend and vue for frontend

MOVIEDB

IMDB like movie browsing website you can search for movies and etc.. i used REST API for the movie datas, i made it using Vuetify and Vuex

CHAT-ROOM

simple chat room where you enter a username and join the name and you can talk with anyone in that room using socket.io, built with Vuetify and vuex

F-LANCERS

Freelancing platform you make an account and post your services there and can be found in search page, and with good security and session management using nuxt-auth, built with Vuetify and expressJS and mongoDB

H E M A

It's my personal website you can visit it to see my other works there like front-end/back-end/UI the link is in the contact section, built with Vuetify
